OPTIMIZATION THROUGH ENHANCED DATA INSIGHTS

In the Office

EnSight+ turns your computer into a turbo-charged platform for visibility and connectivity.

- + Dispatch work orders quickly and efficiently based on geolocation, availability, and job priority.
- + Instantly create, modify, and deploy mobile workflow updates for your technicians, including urgent safety information.
- + Observe vehicle locations in real time, including assigned drivers.
- + Track your technicians' time punches and review each job's expense requests for approval.
- + Visualize data through customized graphs and dashboards.
- + Generate insightful reports directly from your computer.

On the Road

Paired with the desktop application, the EnSight+ mobile app helps keep your technicians working safely and efficiently while traveling.

- + Drivers receive predictive vehicle maintenance alerts and customized maintenance checklists.
- + Smart routing algorithms send your drivers along the most efficient routes and can self-adjust based on schedule changes throughout the day.
- + Receive real-time alerts when a vehicle exceeds the local speed limit or leaves the geofenced area that you've defined.

EnSight+ is a customizable field service management system designed to optimize vehicles, personnel, and work orders through enhanced data insights. Our approach is proven to reduce costs and increase profitability. Improved customer satisfaction, employee safety, and asset protection are just some of the transformative benefits ready to drive your field service business forward.

Born in the Field to Raise Productivity

EnSight+ was developed by experienced field service personnel to address real world operational challenges. Vetted in the demanding utility industry, EnSight+ can be customized to any size fleet, business sector, or mobile workforce objective to eliminate errors, increase productivity, and automate data communications.

Built to be flexible, EnSight+ Field Service Software is tailor-fitted to each business we service. We know the challenges of a non-stop field service world can vary greatly depending on your location, service sector, work order demands, fleet size, etc. Our system eliminates inefficiencies with automated productivity and intelligent integration.

We believe maximum efficiency can be achieved by streamlining your mobile workforce enterprise.

In the Field

EnSight+ helps your technicians find any location in the field and complete each job safely and correctly.

- + View and edit customer information, including recent work order histories.
- + Create tailor-made workflows that require technicians to upload multimedia files such as images, audio, and video.
- + Enable submeter GPS and GIS technology so technicians can quickly locate systems at the job-site.
